

I am concerned about the upcoming vote to further deregulate media ownership. I enjoy receiving information from a diverse media background. I appreciate hearing different viewpoints and feel that I am a better informed citizen of this democracy because I do hear diverse views. I am concerned that further consolidation of the media will continue to erode our abilities to form intelligent opinions. It will be a great disservice to the people of this country if further investigation is not done in order to discover the effect this further consolidation might have. Thank You.
